Accessory code

B452: Protruding triple-projector pole top, attachment 102 mm

Technical description

Protruding pole top for triple projector Lavinia for cylindrical pole (diam. 102 mm). The extruded-aluminium (EN AW 6060 T6) coupling is subjected to liquid grey (RAL 9007) painting and is fixed to the pole by 3 bolts placed at 120°. Joint in aluminium alloy EN1706AC 46100LF. The optical assembly is fixed to the pole top by two fixing screws. Two safety bolts make its application easier. This connection system makes it possible to adjust the inclination of the optical assembly with respect to the road surface by $\pm 15^\circ$. All screws are made of stainless steel.

Installation

The pole top is applied to poles with a diameter of 102 mm

Colour

Grey (15)

Weight (Kg)

2.74

Wiring

The special pole-top attachment ensures the safe passage of the supply cables and permits application on existing 102-mm-diameter poles with no need for holes.

Notes

To be used with terminal board cod.1865

Complies with EN60598-1 and pertinent regulations

IP66
