**Accessory code**

SQ68: Pendant base with Libera module and lux/motion sensor for DALI-2 - for initial or final position

---

**Technical description**

Pendant base for Libera System with module complete with lux/motion sensor for DALI-2 systems. The Libera element with the sensor is fitted with an end cap at one end. This article allows the sensor to be mounted at the start or end of continuous line system compositions. This article allows Libera compositions to be powered if remote power supplies are used. Power and pendant cable L=3000

---

**Installation**

For the correct positioning of the base that determines the position of the sensor, refer to the instruction sheets or contact iGuzzini..

---

**Colour**

White (01) | Black (04) | White/Gold (41) | Black/Brass (57) | Titanium (N8) | Sapphire blue (N9) | Titanium/Brass (Q3) | Sapphire blue/Brass (Q4)

---

**Wiring**

DA-DA terminals for the DALI-2 line in the base (used only as a start or end lux/motion sensor).

DA/DA/+48V/-48V (used both as a start or end lux/motion sensor and a power supply point).

---

**Notes**

For the motion and/or daylight control function, the sensor must be connected to a compatible DALI-2 controller system/app and programmed for this purpose. Contact iGuzzini for the systems compatible with the DALI-2 sensor.

Complies with EN60598-1 and pertinent regulations

IP20

---

**Technical data**

Control:	DALI-2 sensor
