**Product code**

X294: Touch DMX 512

**Technical description**

DMX control panel with glass front that controls RGB DMX luminaires in Plug & Play mode (check which models are compatible with this panel on the Product Book). Using the software supplied (programmable configuration), RGB, RGBW and TW luminaires can be controlled and new shows programmed. It controls 512 channels for each of the 2 DMX lines available; it has an intuitive colour wheel, a display, touch areas for user-friendly scene selection, intensity, colour and speed sequence adjustment. All the connected luminaires emit the same colour.

**Installation**

Mounted on a box with drillholes at a centre-to-centre distance of 60 mm. Box item code ML15 available as an accessory.

**Colour**

White (01) | Black (04)

**Weight (Kg)**

0.1

**Mounting**

wall recessed

**Wiring**

Complete with a compact power feeder.

**Notes**

For special scenes where the luminaires do not emit the same colour (e.g. a rainbow effect) both the panel and the luminaires must be programmed with the software supplied. Contact the company for this specific requirement.

Complies with EN60598-1 and pertinent regulations

**Technical data**

Control: DMX
